SKILLS

Languages	Java, JavaScript, C/C++, Python, Swift, Kotlin, RISC-V Assembly, MATLAB, Verilog
Tools & Frameworks	PyTorch, SwiftUI, LTspice, AutoCAD, SolidWorks
Concepts	Full Stack, Backend, Mobile, Embedded Development, Unit Testing, OOP
Languages (Human)	English (Native), Arabic (Fluent)

EXPERIENCE

Nuclear Electrical Engineer · Portsmouth Naval Shipyard

Feb 2026 – Present

Kittery, ME

- Designed and supported electrical control and instrumentation systems for submarine nuclear propulsion plants.
- Analyzed and troubleshoot circuit-level issues in analog/digital systems, sensors, and embedded electronics.
- Interpreted schematics and PCB-level designs to support system integration and validation.
- Performed hardware testing and validation with a focus on signal integrity, noise reduction, and system reliability.
- Ensured compliance with NAVSEA standards, electrical specifications, and nuclear safety requirements.
- Collaborated cross-functionally to implement hardware upgrades and improve subsystem performance and fault tolerance.

Network Operations Officer (O-1) · U.S. Army (Reserve)

Dec 2021 – Present

Fort Dix, NJ

- Top Secret Clearance (TS/SCI)
- Design, implement, and maintain secure voice, data, and information communication systems.
- Plan and manage large-scale communication infrastructure in high-pressure environments.
- Supervise technical teams to ensure optimal performance of advanced communication networks.
- Troubleshoot and resolve complex system issues to maintain uninterrupted operations.
- Apply systems engineering principles to develop and execute tactical communication solutions.
- Ensure cybersecurity measures for sensitive communication networks.

Technical Specialist · Apple

Feb 2022 – Present

Freehold, NJ

- Completed troubleshooting and diagnostics utilizing company resources.
- Translated complex technical issues into digestible language for non-technical users.
- Suggested software and hardware modifications to improve overall functionality.
- Resolved a diverse range of technical issues across multiple systems and applications for end users.
- Assisted customers in identifying issues and explained solutions to restore service and functionality.
- Thoroughly documented support interactions for future reference.

EDUCATION

B.S. Electrical & Computer Engineering · Rutgers University

Sep 2021 – May 2025

New Brunswick, NJ

- GPA: 3.20/4.0 · Minor in Computer Science and Military Science

PROJECTS

Landlord Mobile Application

Sep 2026 – Present

New Mexico State University

- Lead a team of CS students in developing a mobile application for a 100+ unit rental portfolio.
- Independently designed and maintained a locally hosted server for the client, enabling secure data storage and retrieval.
- Contributed to the design and implementation of both backend and frontend components, ensuring seamless integration and user experience.
- Implemented secure authentication and authorization mechanisms to protect user data and privacy.

Drink Sync — Hydration Tracker (ECE Capstone)

Sep 2024 – May 2025

Rutgers University

- Co-authored and presented an internationally published IEEE paper on a low cost IoT hydration tracking attachment.
- Implemented microcontroller programming to process real-time sensor data and calculate fluid consumption.
- Engineered hardware (Arduino Nano, HX711 Load Cells, MPU6050 IMU) to measure water intake and user activity.
- Demonstrated project management skills by overseeing the development lifecycle from concept to functional prototype.
- Programmed a Kotlin Android App with BLE streaming, real-time data visualization, and gamified goal tracking.
